MACSTUDIO
BY MICRODENTAL LABORATORIES

Developed 18 years ago by dentists and MicroDental, Macstudio restorations are the leading choice for dentists who are committed to life-changing dentistry.

Dr. Malotky's treatment plan began with a meaningful discussion with Julie who was unhappy with her existing bonded fillings and tooth decay. Julie expressed aspirations of obtaining a healthy, youthful smile again, for which Dr. Malotky presented a smile design that incorporated the use of implants, crowns, and veneers. With collaborative and detailed case planning between the Macstudio team and Dr. Malotky, custom shaded temporaries were crafted for Julie to preview prior to beginning treatment. The end result allowed Julie to realize her dreams of a fresh and natural-looking smile once again.

From full-mouth rejuvenations to single tooth restorations; MACVENEERS™ to crowns, bridges, implants and removables; Macstudio restorations can create A SMILE FOR EVERY STORY™.
